

# Finishing Lime

## Rockwell's Lime-Cote®

- Ultra-white
- No soaking required
- High yeild
- Flake Free
- Mix just three to five minutes
- Meets all national specifications, ie. (ASTM, UBC, BOCA, SBCC)

# For a Greater Yield, Rockwell's Lime-Cote is the Clear Choice

Rockwell's Lime-Cote Finishing Lime provides a much greater yield than competitive products. Formulated especially for finish coats, plasters

count on the uniform consistency to provide an easy to work with, high plasticity finish.

## Machine Mix Recommendation

Mix 7 to 8 gallons of clean water to each 50 lb. bag.

1. Pour water into clean mixer.
2. Add lime slowly and mix until putty is smooth.
3. Place putty on mixing board and form ring. Add water for gauging. Use approximately 1 part gauging plaster to 3 parts putty. Mix thoroughly.
