4. First Aid Measures

**Eyes:** Flush victim’s eyes thoroughly with large quantities of water, including under eye lids. Get medical attention if irritation persists.

**Skin:** Remove dusty clothing. Wash skin thoroughly with soap and water. Launder clothing before re-use. Get medical attention if irritation persists.

**Ingestion:** Get medical attention if a large amount is swallowed.

**Inhalation:** Remove victim to fresh air. If symptoms persist or breathing is difficult, get medical attention.

**Most Important Symptoms:** Eye and respiratory irritation due to exposure to dust.

**Immediate medical attention / special treatment?** No immediate medical attention anticipated.

5. Fire Fighting Measures

**Suitable (and unsuitable) fire extinguishing media:** Use extinguishing media appropriate for surrounding conditions.

**Specific hazards arising from the product** Decomposes at 950 °C to produce calcium oxide and magnesium oxide.

**Special protective equipment and precautions for fire fighters** Dust that becomes wet may cause surfaces to be extremely slippery and cause a slip hazard.

6. Accidental Release Measures

**Personal precautions, protective equipment, emergency procedures:**

Avoid eye and skin contact. Avoid generating airborne dust. Wear appropriate clothing to prevent skin contact. Wearing of standard SCBA should be adequate to protect against inhalation of dust.

**Methods and materials for containment and clean up:**

Utilize cleanup methods that minimize generating dust: vacuum. Avoid dry sweeping. Water may be used to control dust, but wet dust can be very slippery and result in a slip hazard. Residue on surfaces may be removed with water or vinegar.

7. Handling & Storage

**Safe Handling:** Avoid skin and eye contact. Avoid generating airborne dust. An eye wash station should be readily available when this product is handled.

**Safe Storage:** Store in dry, well ventilated areas, away from incompatible materials.

Engineering Controls: Use with adequate general or local exhaust ventilation and to maintain exposure below occupational exposure limits.

Individual Protection Measures (Personal Protective Equipment):

Specific Eye / Face Protection: In windy conditions, or if work activity generates elevated airborne dust levels, dust proof or chemical goggles are recommended.

Specific Skin Protection: When prolonged skin contact is likely to occur, wear appropriate clothing and gloves.

Specific Respiratory Protection: If exposure limits are exceeded, an approved particulate respirator, or supplied air respirator, appropriate for the airborne concentrations, should be used. Selection and use of the respiratory protective equipment must be in accordance with applicable regulations and good industrial hygiene practices.
